Subject: Pilotage for the heavy-duty transport on August 2nd, 2017, in the port of Szczecin

Ladies and Gentlemen,

we would like to thank you sincerely for the pilotage services which your two pilots Miroslaw Drozd and Piotr Kabut carried out in a cautious and responsible way for guiding the two port tugboats Euros and Heros and tugboat Fairplay V in standby. Your colleagues' nautical experience as well as their knowledge of the local, familiar 'territory' have certainly contributed to complete the heavy-duty transport safely and successfully. Being personally present on the spot, I can confirm an absolutely jerk- and acceleration-free warping of the barge carrier 10. Many thanks for this great job!

With kind regards  
thyssenkrupp Industrial Solutions AG
